

## WHEELS RALLYE TEAM

# FREE CAR RALLY #1

---

### GENERAL INSTRUCTIONS

#### WELCOME

Welcome to the Free Car Rally Presented by WHEELS RALLYE TEAM. This rally has basic gimmicks with a few curveballs thrown in. After you finish the rallye, send us in your scoresheet and we will send you the answers and explanations of the gimmicks. Please use the following e-mail: wheelsrallye-team@aol.com. You can run it anytime and if you wish grab a hot dog at Rand Rd Red Hots then you finish. There won't be a trophy, for you on this rallye, but it is a good opportunity to bone up on regular rallye gimmicks and procedures. Have fun. We are in Park Ridge where they still use vertical street markers on most corners, read all street signs as intended. Just a note that if you can't get out to run this event for any reason, feel free to run it in Google Maps Street View from the comfort of your own home. Start at Mariano's parking lot on Cumberland just North of I-90.(corner of Higgins Rd).

#### Route Procedure

The rallye runs on open public roads only, alleys, parking lots with the exception of the start and endpoint, are non-existent, as are driveways and any private property.

Each route instruction is preceded by a number. Route instructions are to be performed in ascending consecutive numerical order starting with route instruction 1. Each route instruction must be performed by physical evidence seen from the course at the first chance to do so, unless otherwise specified. If you do not have an instruction that applies travel as straight as possible or go right at tee and continue to look for where your instruction applies.

When it comes to road names we usually refer to the names as Smith, Jones, etc. not regarding the prefixes of N, S, E, W, North, South, East, west, Old or new. Road = rd = street = avenue = lane, etc. Thus if you had a road named Old Smith Road. We will probably just refer to it as Smith. Any road segment marked as "no outlet" or "dead end" are non-existent.

Always take the order or precedence in mind where you have more than one type of instruction to perform at the same point. The order of precedence is: General Instructions, Route instructions, Right at Tee then straight.

Make no U turns on the route. B = T.

---

#### QUESTIONS

There will be questions asked of you during the rallye. Each valid question is indicated by the capital letter Q and a number, then completed by a question mark. A question replies from the completion of the route instruction most nearly above to the completion of the route instruction most nearly below. The route instructions are considered to be one continuous page. Answer each question and put the answer on the score sheet in the spaces provided. Some questions may be invalid and these should be left blank.

#### SIGNS

Any thing in quotes, "example" refers to a sign. Spelling must be correct, but font, spacing, case type and color are irrelevant. Signs are quoted from left to right, top to bottom—note that a street sign written anyway can be read. Only numbers and letters and arrows are existent on a sign, anything else is considered artwork. Artwork is non-existent. Letters and numbers must be in contiguous order and no letter can be skipped within the quote, on a sign. Separate signs on the same structure are the same sign. You should never look backward to read a sign. Signs will be to the left, right or in front of you. Signs may be quoted in full or part.

##### Definitions

Stop Sign—An official highway sign at an intersection containing the word "stop" at which you are required to stop.

Sideroad—A named road that extends from your named road in only one direction.

Direction - right or left.

Intersection—The meeting or crossing of two more named roads.

Crossroad—An intersection where another named road crosses your named road.

Tee—An intersection in the general shape of the letter T, where you have a chance to go right, a chance to go left, but no chance to go straight ahead. Lazy tees are tees.
