

MONTH	TOPIC	CHAPTER IN BOOK
September	Nature of Science	2
	Introduction to the types of science	2
	Scientific Method	2
	Our place in the universe	1
	Parts of the Earth –Land, Water and Air	1
	Measurements, Volume, Density, Temperature	None
	Changing the environment	3
	Survival of Organisms and their placement in the ecosystem	3
	Ecosystem structure, energy and roles of organisms	4
October	Chemical Cycles	4
	Habitats, Niches, Evolution Adaptation and Populations	5
	Ecosystem Balance and the relationships among the organisms	6
	Ecological Succession	6
	Land Biomes	6
November & December	Biomes	7,8,9,10,11
	SCIENCE FAIR	
January	People in the Global Ecosystem	12,13
February	Surviving in the World	14
March	Organic Fuels, Nuclear, Solar, Wind & Hydroelectric fuel	15,16,17
April	Wind and Geothermal Energy	17
	Minerals and soil	18
	Land Pollution	19
May/June	Water uses, resources and treatment	20
	Water, Air and Noise Pollution	21,22

Final Exams will occur during the last two weeks of each semester and will cover all chapters of that semester.

Any of the above information is subject to change.
